Objective

Computer systems development leadership position, highly leveraged, technically challenging. Growth opportunity.

Skills

Highly effective technical leader and software engineer. Intelligent, dynamic, solution-oriented. Outstanding problem-solving skills.

Project Management

18 years as software consultant to Lawrence Livermore National Laboratory, mostly in security systems engineering.

Personnel Management

Team leader of up to 12 programmers, hardware engineers and technical writers.

Software Architect

Lead design of 1 million lines of code software system. Elements include real-time embedded, networks, relational databases and graphical user interfaces.

Operations Architect

Designed and implemented software, hardware, documentation and QA procedures for \$60 million business at LLNL.

Software Engineering

Outstanding analyst, architect, designer, and coder. Main languages: Ada, C++, HTML, SQL.

Main operating systems: Windows NT, VMS.

Current Employment

Senior Software Engineer, Lawrence Livermore National Laboratory.

Presently software team leader (DAPL) for Argus development team.

DOE "Q" clearance, (top-secret), PSAP program

Education

B.A. Mathematics, Grinnell College, 1982.

Papers

Software Evolution In Practice

Refereed IEEE Conference on Software Maintenance, 1994.

Several other technical papers.

Personal

40 years old, married, children 9 and 7. Non-smoker.

Private pilot, instrument rated.

Amateur figure skater.

Amateur classical pianist. Movie fan.

Weekly aid at elementary school.

Enjoys bridge (the card game).
